Metody push

Metoda dodaje element na początek listy

Listing 1: push_front()
```python
def push_front(list: List):
        pass
```

Metoda push_back dodaje element na koniec listy

Listing 2: push_back()
```python
def push_back(list: List):
        pass
```

Metody pop

Listing 3: pop_back()
```python
def pop_back(list: List):
        pass
```

Listing 4: pop_front()
```python
def pop_front(list: List):
        pass
```
